

# Oil Absorbtion Log

## Specialty Bags

▪ Plating Solutions

▪ Produced Fluids

▪ Waste Water

▪ Parts Cleaning

▪ Automotive Paints

The Strainrite Companies [Oil Absorbtion Logs](#) are made from polypropylene melt blown microfiber and felt media. The log is surrounded with a heavy polypropylene mesh cover with a polypropylene center core for rigidity.

These logs can either be inserted inside a filter bag or can float on top of oil contaminate drums or vats. The unique design enhances the media's ability to "wick" the free oil and grease from contaminated liquid. The only Delta P restrictions you have is based on that of the filter bag itself, as the flow of liquids passes around the oil log.

## Features & Benefits

### Oil Absorbtion Logs

- Made from polypropylene melt blown microfiber and felt media
- Heavy polypropylene mesh cover
- Polypropylene center core for rigidity

## Specifications

### Available Sizes & Oil Absorbing Capacity

	Diameter	Length	Capacity
OE-LOG-1B	3"	15"	190 grams
OE-LOG-2B	3"	24"	355 grams

## Ordering Information

Code   Material		Code   Material	
OE-LOG	Oil Absorbtion Log	1B	3" dia x 15" long
		2B	3" dia x 24" long
