ABSORB-RITE® BAGS

Specialty Bags

PRODUCT HIGHLIGHTS

- **Unique three layer construction** results in maximum exposure time at minimum flow rate
- **The top disc pre-filter material** removes dirt and other particulate material prior to the adsorption of hydrocarbons
- **Designs available** to remove particles in the 1–200 micron range
- **Higher hydrocarbon removal capacity** than other filter bags on the market
- **Higher capacity** than most other bags on the market
- **Standard bags fit** SRID and SRHD filter vessels (fit competitor housings as well)
- **Designed to minimize contamination** during changeover

PRODUCT DESCRIPTION

The Absorb-Rite® filter bag from The Strainrite Companies substantially reduces oil and grease from aqueous based liquids. The Absorb-Rite® bag offers a unique two-in-one design that forces the liquid through the entire length of the filter, therefore uniformly utilizing all the absorbant media.

Typically, this unique filter absorbs 10-15 times its weight in oil. The Absorb-Rite® offers in excess of 50% more absorbency than competing brands.

Absorb-Rite® filter bags are available to fit all bag filter housings. Anywhere oil or grease must be separated and removed from an industrial stream, bags are designed to fill the need. Best results at low flow rates to achieve longer contact time.
