SPECIALTY BAGS FOR OIL

Oil Bag & Oil Absorption Log- Specialty Bags

PRODUCT HIGHLIGHTS

OIL BAG

- **Dual-function** oil/particulate removal
- **Multiple efficiency's available** from 1 micron to 200 micron
- **Can be made with steel ring**, M-flange or P-flange
- **Recommended flow rate:**
  Oil Bag #1: 25 gpm
  Oil Bag #2: 50 gpm
- **Oil capacity:**
  Oil Bag #1: 1,790 grams
  Oil Bag #2: 2,890 grams

PRODUCT DESCRIPTION

The Strainrite Companies Oil Absorbing Filter Bags are made from polypropylene media that absorb oil. Oil bags utilize multi-layered technology to absorb trace amount of oils form water at moderate flow rates. Typically sizes are #1 and #2 industry standards and other sizes are avaiable upon request.

The Strainrite Companies Oil Absorbtion Logs are made from polypropylene melt blown microfiber and felt media. The log is surrounded with a heavy polypropylene mesh cover with a polypropylene center core for rigidity. These logs can either be inserted inside a filter bag or can float on top of oil contaminate drums or vats. The unique design enhances the media's ability to "wick" the free oil and grease from contaminated liquid. The only Delta P restrictions you have is based on that of the filter bag itself, as the flow of liquids passes around the oil log.
