SRC multi-cartridge

PRODUCT DESCRIPTION

The Strainrite Companies is known for developing some of the industry's most advanced designed hybrid cartridge elements on the market. These high efficiency filter elements require a vessel that has a hermetically sealed top to fully capture all of the filters capabilities. The SRC Industrial Duty Cartridge Vessel is perfectly positioned to handle standard cartridges and absolute rated filters.

The SRC has a machined surface that produces a positive seal to eliminate by-pass. The SRC vessel line is raising the bar in the Original Equipment Manufacture market by delivering superior value in a cost-effective design.
