## Industrial Duty Cartridge Vessels

The Strainrite Companies is known for developing some of the industry's most advanced designed hybrid cartridge elements on the market. These high efficiency filter elements require a vessel that has a hermetically sealed top to fully capture all of the filters capabilities. The SRC Industrial Duty Cartridge Vessel is perfectly positioned to handle standard cartridges and absolute rated filters.

With a radial seal, the SRC has a machined surface that produces a positive seal to eliminate bypass. The SRC vessel line is raising the bar in the Original Equipment Manufacture market by delivering superior value in a cost-effective design.
